“What does Carolina Trackout Science and Math Academy do?”

Carolina Trackout Science and Math Academy conducts the best Science and Math camps during trackout and Summer. These camps also include Spanish lessons, Art classes based on the Science topics, indoor and outdoor sports and some field trips. These are offered every week from M-F from 9am-5pm.

Note: Before and after care is available if needed.

Carolina Trackout Science and Math Academy offers after school program from 3pm-6pm. It is a structured program where kids are given time to finish their homework, reading, games and other fun activities.

****NEW**** Carolina Trackout Science and Math Academy Buddying Scientists Program for ages 4-6: This will start in the first week of September 2010. This will be (once a week) 6 weeks long program. We will have only 15 seats available in this program. The admissions will be given on first come first serve basis. (Please contact us for details).

Carolina Trackout Science and Math Academy technology program is for kids and adults (11-99 years old).

You can request the topics by sending email to mathsctraining@yahoo.com. This works the best if you have a group of 4-5 students interested in learning a technology topic offered by the academy.

Carolina Trackout Science and Math Academy tutoring program is for kids attending grades 1 through 10. Our staff is highly qualified in teaching Science, Math, Spanish and Art. Kids may choose to attend tutoring (group or 1-1) once, twice or three times a week, for an hour.

Our goal is to create love for Science, Math and Technology and create confidence in our students by teaching Math and Science concepts using heuristic methods. The results from 2009-2010 EOG and EOC students at Carolina Trackout Science and Math Academy shows significant increase in their understanding of math concepts, and overall school performance. 100% of our students received B+ to A+ scores on their EOC and over all school performance. Over 50% of all our students scored a “4” and rest scored a “high 3” on their EOG.

Why should we choose Carolina Trackout Science and Math Academy tutoring program?

Carolina Trackout Science and Math Academy tutoring program is for 1-10 grade kids. We offer help when they need it. It is an interactive program. We stay with kid's school curriculum to offer timely help. We also help with their

homework when requested. This helps them to get over the hurdles and gain confidence in what they do at school. We provide fun and loving atmosphere while teaching. All our student seem to gain confidence within short period after they start our tutoring program. We have variety of Math and Science books and videos to get the workout they need. Our group tutoring sessions are comprised of 4-5 students. Due to small group sizes, each student gets personal attention.

In our program, parents, school teachers and our staff are equal partners in helping our students in complimenting what they learn at the school and achieving their highest potential.

Our curriculum is designed by our experienced director and assisting staff to fit individual needs.

Our results show at least one grade level improvement in EOG and EOC scores.

Our friendly staff members make Science and Math fun for the Kids.

Why are Trackout and Summer Camps at Carolina Trackout Science and Math Academy so important?

Because without those stimulating activities at our camps, something called summer or trackout learning loss occurs. Researchers estimate that students can loose two months of math and reading achievement owing to a lack of reinforcement during the summer break (refer to www.time.com time magazine). At Carolina Trackout we have researched and have come up with a more creative and theme-oriented curriculum in Science, Math and Technology. We have complimented these topics with languages like Spanish and German. Also, lessons in Science and Math are combined with Art activities to make it a fun learning experience. The educational field trips, educational videos and library of Science and Math books helps kids to get motivated in research and technology.

American schools have been slipping for decades. American students are now 32nd internationally in math scores, 10th in science, 12th in reading. It will be impossible to rebuild our economy, to create the sophisticated, high-paying jobs we need. It's also hard to keep a strong democracy with a citizenry that is increasingly uneducated and ill informed. Barack Obama began to change that last year with Race to the Top. The camps at Carolina Trackout are our humble efforts to help our community children to race to the top and excel in every aspect of their lives and be confident in what they do.

I think, the President's instincts are absolutely right, that the way we're going to create a great economy and a strong country and a vibrant democracy is by better educating all of our children.
